## 2 Introduction

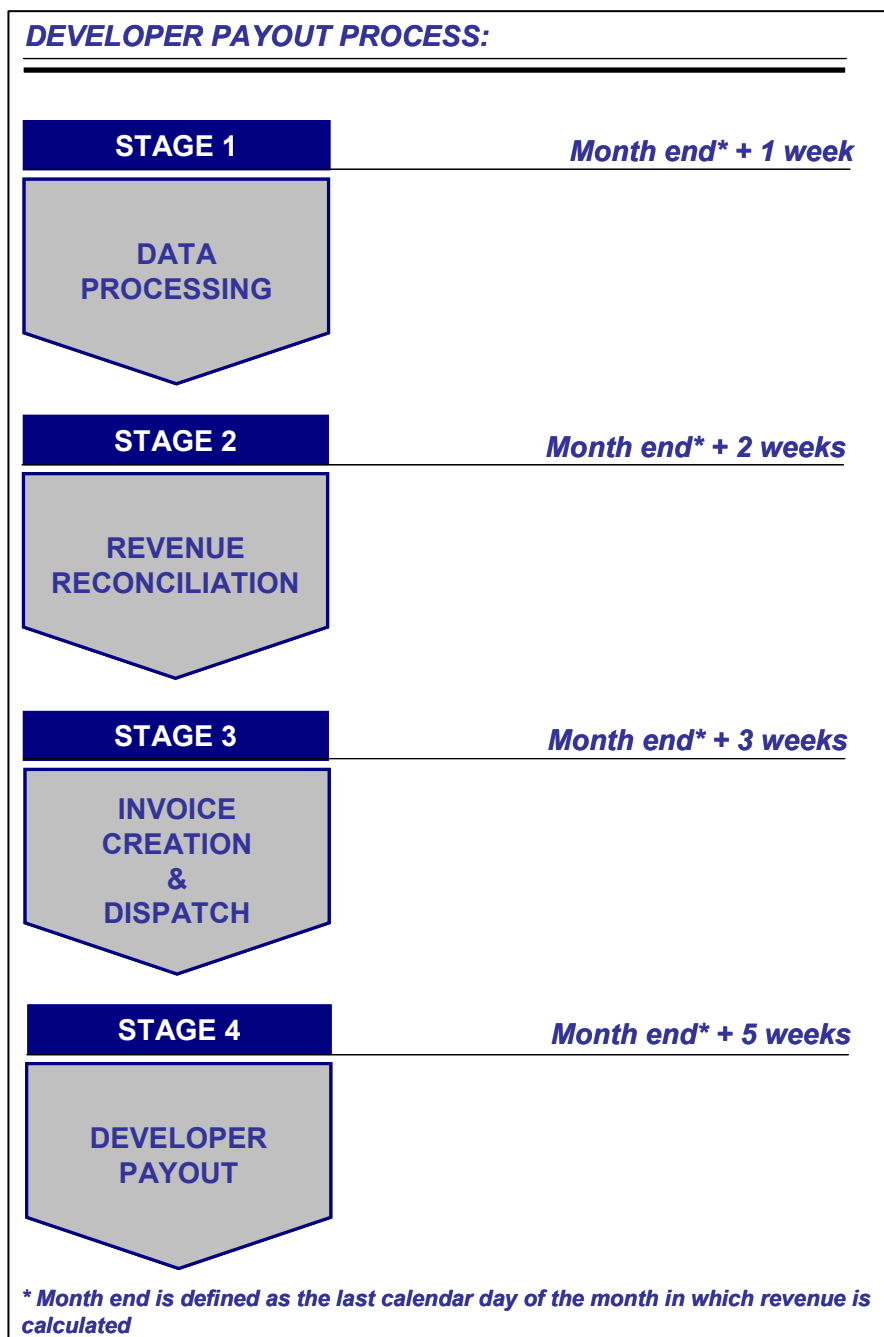

This Developer guide outlines the O2 Litmus Revenue and Payment process to Developers.

### 3 Revenue and Payments Process

O2 Litmus operates monthly payment cycles. The process is shown below.

Apps sold in any month will be paid approximately 5 weeks after the last calendar day of that month.

So for example, if you sold one app on the 3<sup>rd</sup> February 2009 and another app on the 27th February, payment for both will be deposited week commencing 6th April 2009.

## 4 General considerations for developers

### **How much revenue share will O2 pay me?**

The amount of the revenue share is detailed in the O2 Litmus Developer Terms and Conditions.

### **Can I sell apps to non-O2 customers via O2 Litmus?**

No, O2 Litmus is exclusively for O2 customers.

### **I sold an app 5 weeks ago. Why haven't I been paid?**

Litmus operates monthly payment cycles. Applications sold in a month will be paid approximately 5 weeks after the last calendar day of the month your application was sold in.

If you sold an application early in a given month, then payment will take more than 5 weeks following the sale.

### **What currencies does Litmus support?**

O2 Customers can only purchase your apps in Sterling, which is billed direct to their O2 mobile.

Revenue share payments for apps sold on O2 Litmus can be made in Sterling, Euros or US Dollars. Payments made in Euros or Dollars are subject to banking fees.

### **Why do I have to pay bank fees?**

O2 are charged make payments in non-sterling currencies by the Bank and this is passed on at the bank rate.

In order to minimise the impact of bank fees, payment to developers paid in Euros or US Dollars will accrue each month and be paid once the revenue share due has exceeded the £50.

Currently O2 Litmus only supports payments by direct bank transfer in UK Sterling, Euros or US Dollars.
